

Bed Assembly Instructions

Thank you for purchasing our Canadian-made products

We suggest adding wood glue to the ends of the logs prior to inserting them into the holes but this is not mandatory.

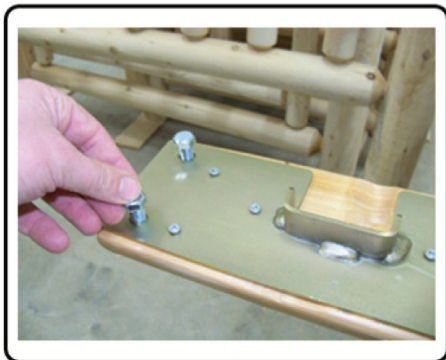

1) Parts:
4 brackets, 8 screws, 8bolts, footboard, headboard, 2 rails, 4 slats

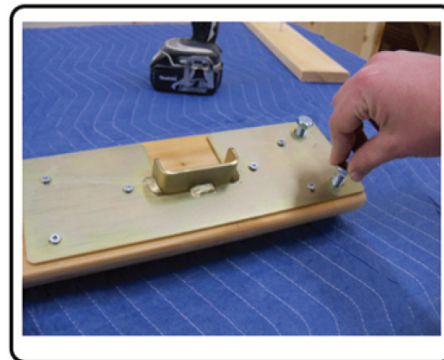

2) Insert brackets into pre-drilled holes on legs. Use higher holes if you have under-bed storage or if you just prefer a higher bed.

3) Install all 4 brackets, Left and Right side of headboard and footboard. Note: Bolt heads are closest to the mattress, slot openings face upward, as shown.

4) Insert 2 bolts into the holes at the end of the rail.

5) Insert bolts at each end. Repeat on other rail.

6) Stand headboard and footboard up roughly the distance of the rails. Have someone at each end.

7) Hook rails onto post brackets both sides.

8) Queen & King beds: Screw support board to the centre of the middle slat with two 2½" screws and adjust its foot.

Your bed is now assembled!

Bolts should be tightened periodically to ensure a long-lasting bed.
